Emissions By Category	7
Conclusions	8

INTRODUCTION

2021 marks the first year that we have reported on our overall company carbon footprint. This is the first step on our Net Zero journey.

The results contained within this report will serve as the baseline against which all our future results will be measured. Measuring our carbon footprint over the coming years will help us understand where our emissions are coming from and how to reduce them.

At Mallon, we want to positively impact the environment and our people. This means we will take steps to track, monitor, and report on the carbon emissions generated by our business activities.

CARBON FOOTPRINT 2021 RESULTS

173,926 kgCO₂e

Total emissions for 2021

Our 2021 emissions are equivalent to:

510

Round trips from
London to Barcelona

39

Petrol cars driven for
1 year

22

Homes powered for
1 year

CARBON INTENSITY

Carbon Intensity by Employee (FTE) 2021

1,552.911 kgCO₂e

Mallon Technology's emissions per employee are 98.3% lower than the average business in 2021

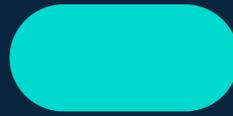

Carbon Intensity by Revenue 2021

0.038 kgCO₂e

Mallon Technology's emissions per £ are 97.7% lower than the average business for 2021

EMISSIONS BY SCOPE

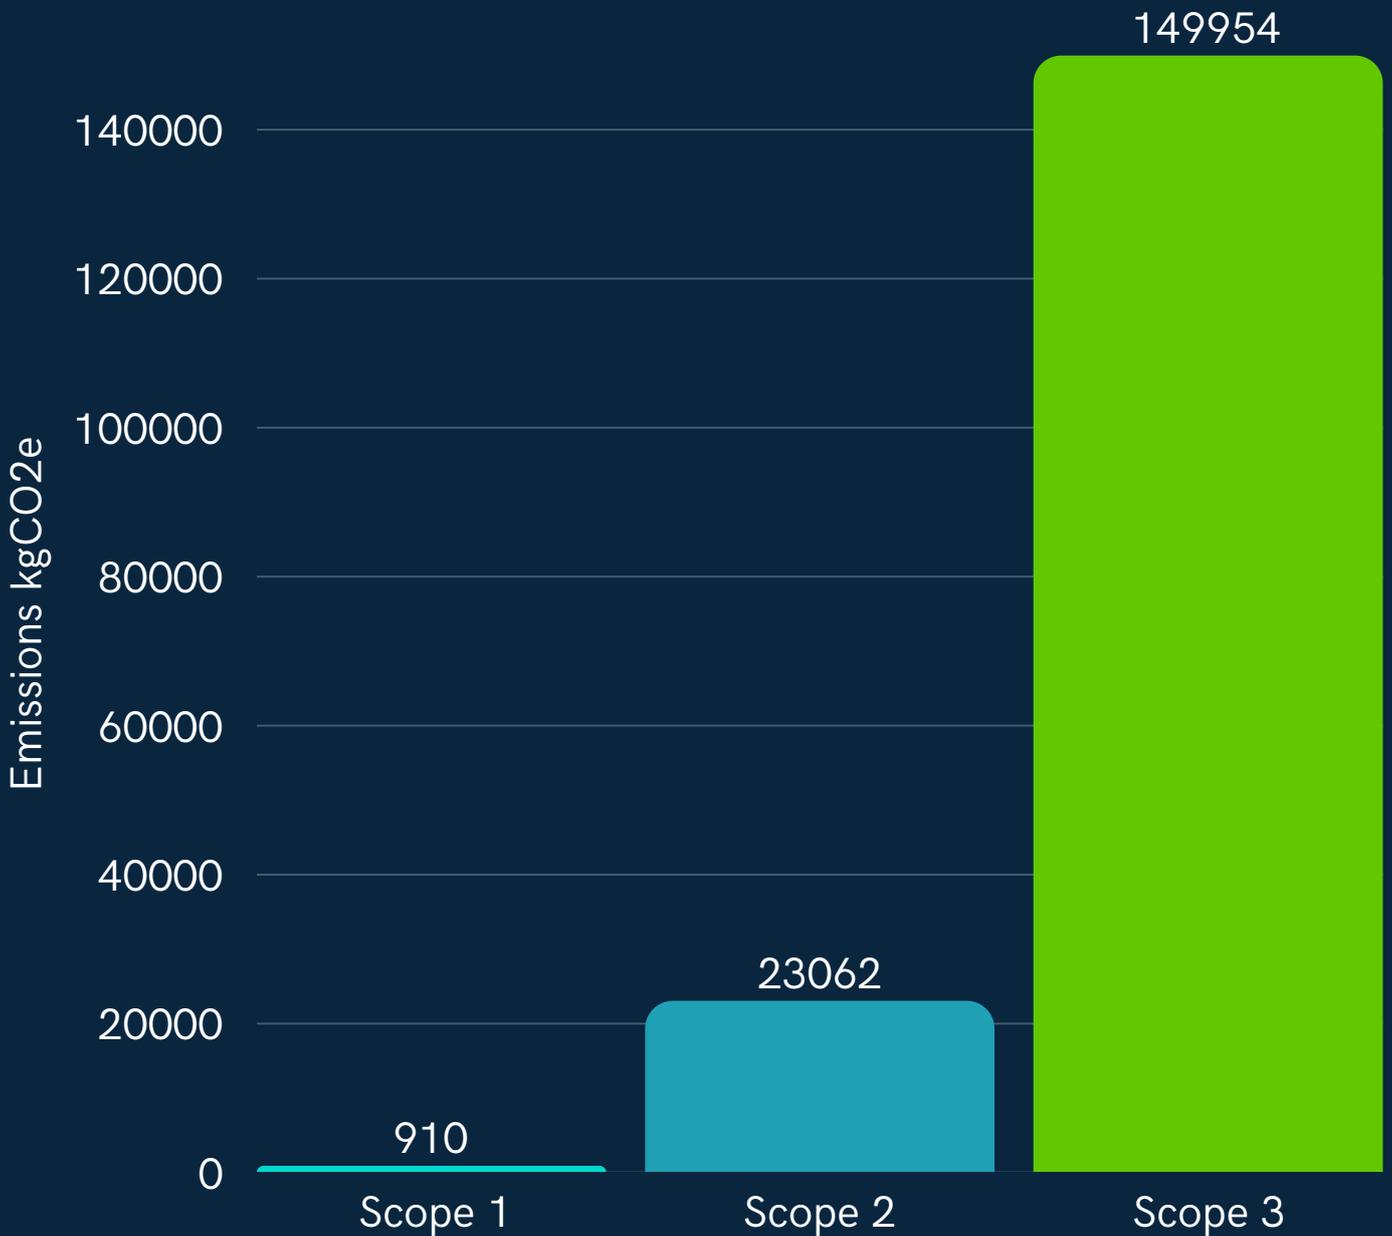

Scope 1: 0.5%

Scope 2: 13.3%

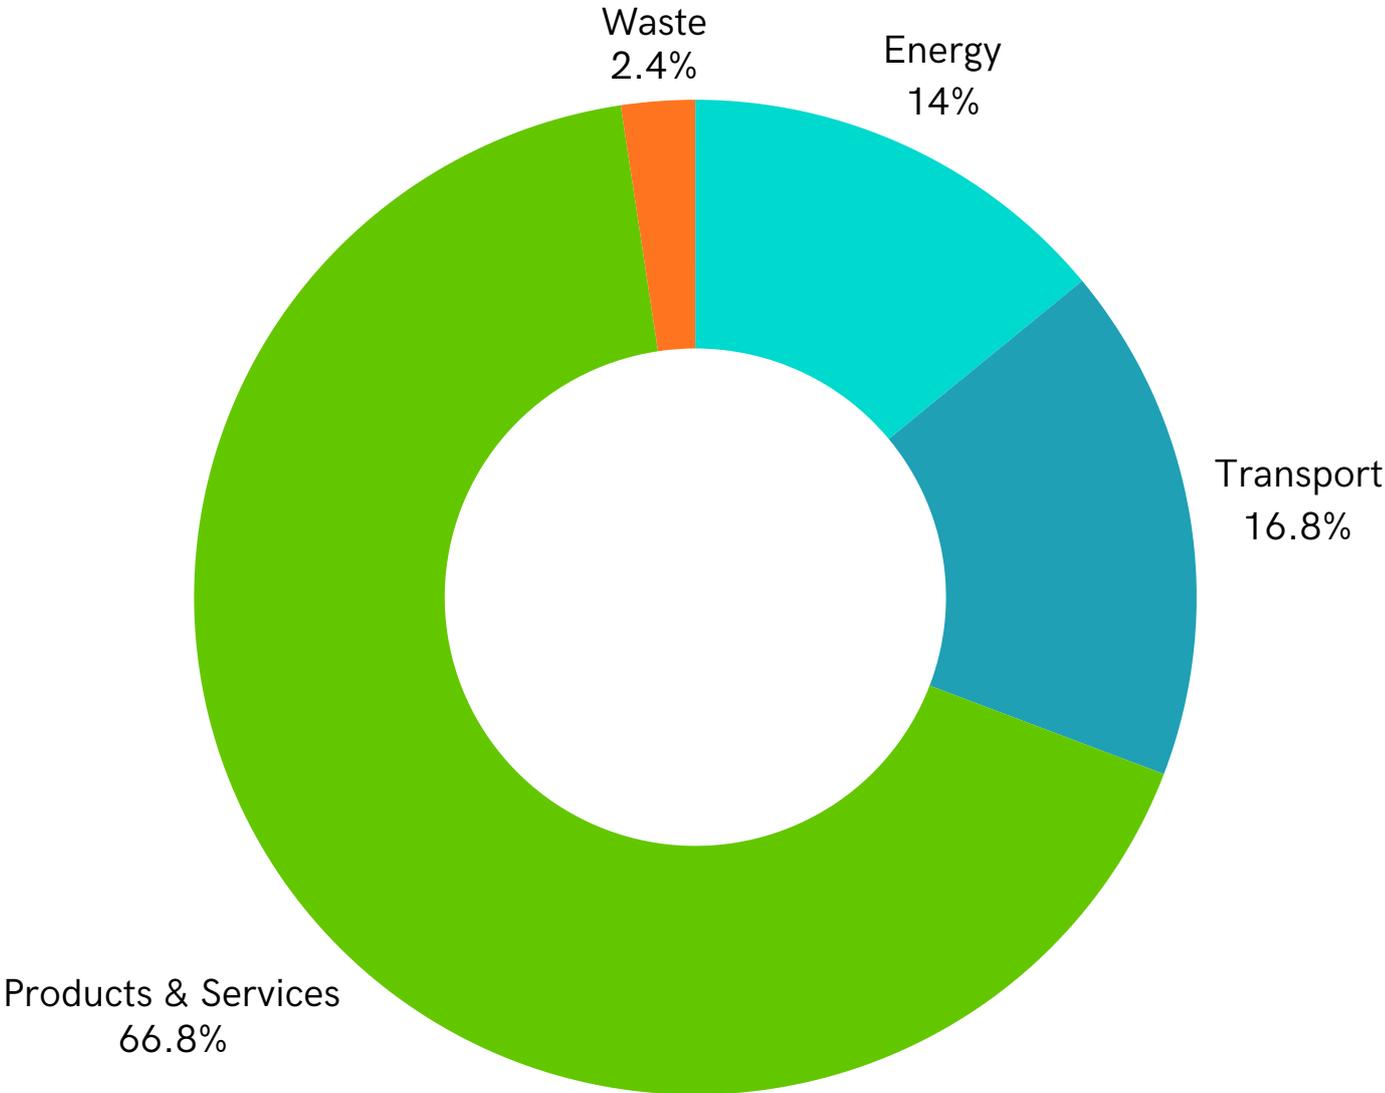

Scope 3: 86.2%

EMISSIONS BY CATEGORY

- Energy: 24,403 kgCO₂e
- Transport: 29,141 kgCO₂e
- Products & Services: 116,244 kgCO₂e
- Waste: 4,138 kgCO₂e

CONCLUSIONS

Mallon Technology's first Carbon Footprint report is the first step towards achieving Net Zero by 2040. The results above will act as our baseline year and will help to guide our future endeavours.

Our baseline year is a positive start to our Net Zero journey. Our Scope 1 & 2 emissions (those we are directly responsible for) only account for 13.8% of our total emissions.

In support of our Net Zero ambitions, Mallon has appointed an Environmental Manager. The Environmental Manager will be responsible for monitoring and calculating the company's carbon footprint, and for implementing new strategies to reduce it.

Our 2021 results will be used to identify and implement policies that will support future emissions reductions.
