

Book Scanning

Preserve and protect your historical book collections for use and enjoyment by generations to come.

Books have the power to inform, entertain and delight readers, but over time, continued use can cause irreparable damage. Our book scanning service can quickly and accurately capture your entire book collection to ensure it can be read and accessed for years to come.

Using the latest state of the art book scanning equipment, we can capture the highest quality reproduction of your collection whilst protecting your books from further deterioration.

Our book scanning service has been leading the industry for over 15 years, helping clients across the public and private sectors to preserve and improve access to their book collections.

Benefits of Book Scanning

Reduce Costs - eliminate retrieval and access costs associated with historical book collections

Share Information - easily share scanned images, information & findings with colleagues or the public

On-Site Scanning - delicate, valuable or rare books can be captured by our team on location

Instant Searching - keyword searches improve productivity & remove the need for manual searches

Maximise Document Usage - turn books into searchable text & easily find the information you require

Preserve your Historical Books - scan books up to A3 in size at 400dpi & protect them from deterioration
