

Document Capture

Get your digital transformation process started by digitally capturing your physical documents, records and assets.

Capable of handling all file types and sizes, our document capture services can help to streamline your processes and reduce costs, improving the management and maintenance of your paper-based records.

Our services can also assist your organisation in compliance with GDPR legislation by creating an easily searchable and retrievable digital catalogue of your records to help facilitate any subject data requests.

We provide a comprehensive range of document capture services that help organisations to effectively manage and maintain their physical and digital records.
