

e-Inspect

The Complete GIS Field Mapping and Data Collection Solution

Developed exclusively by Mallon Technology, e-Inspect leverages GIS and GPS technology to help optimise field mapping operations for automated and manual field data collection.

Tough and robust, e-Inspect has been optimised to deal with any of the conditions you may encounter whilst out in the field. Built upon a spatial database, our system allows for the quick and easy capture, storage, editing and display of your spatial data.

Featuring seamless integration with your back-end office system, e-Inspect facilitates the efficient management and sharing of information.

- ✓ Standardises field data collection and management
- ✓ Features advanced drawing, editing and measuring tools
- ✓ Supports all common map and spatial data types
- ✓ GPS enabled, allowing routes to be traced and locations tracked
- ✓ Fully customisable layers and labels
- ✓ Available on a range of windows tablets and laptops
