

Fire Certificate Scanning

Extend the functionality of your Diamond Fire System by scanning and digitally capturing your fire certificate and premises files.

Specialising in the capture of large volumes of paper files, we can provide you with quick and easy access to the information you need in critical situations.

The capture of your historical files makes it possible to build a complete picture of all decisions and certifications issued for any premises.

With decades of experience working alongside Fire Services in Ireland, we are the only organisation who can guarantee the seamless integration of your fire certificate files into your Diamond Fire System.

Benefits of Fire Certificate Scanning

Never lose access to your documents or files by creating a secure digital backup

Reduce costs & free up valuable office space with digital access to physical records

Enable multiple users to access the same files at the same time

Preserve the quality & integrity of your paper files

Easily find & access all historical files, certifications & decisions for any premises

Maximise document usage by providing access to files that would have remained hidden in storage

Reduce your reliance on paper & help meet environmental targets

All paper files & documents can be picked up & returned by us
