

Expert GIS Consultancy

Independent consultancy, advice & support that will help maximise your use of geographic information.

For over two decades, we have been providing organisations in the public and private sectors, with the tools, expertise and support that are helping to inform strategic decision making and drive further business success.

We have one of the largest and most experienced teams of GIS professionals in Ireland, who can guide and advise on the latest GIS technologies & techniques that will deliver real benefits to your organisation.

GIS Consultancy Services

- ✓ GIS Systems Integration - take advantage of the latest technology by integrating GIS functionality into your business processes
- ✓ GIS Application Development - we can develop custom applications designed to meet your specific GIS requirements
- ✓ Data Analysis - support decisions & gain new insights into your geographic data
- ✓ GIS Consultation - our experts can review your software, systems & processes to advise on the most appropriate solutions
- ✓ Project management - help to complete any GIS project with our team of PRINCE2 certified practitioners
- ✓ GIS Systems Support - help to support & maintain your existing GIS system
