

# Large Format Scanning

Improve efficiency and productivity in your organisation with the digital capture of your large physical assets.

With the capacity to scan documents up to 1068mm wide (A0+) to virtually any height, our large format scanning service will enable your organisation to more effectively manage, access and display its large documents.

From artwork, posters and architect drawings to maps, building plans and engineering drawings, we are experienced in capturing a wide range of documentation.

Whether for a one-off scan or an entire catalogue, we can cost effectively scan all your large format documents.

## Benefits of Large Format Scanning

Disaster Recovery - Never lose access to your large physical records

Create Quality Reproductions - print exact replicas of your assets for use or display within your organisation

Maximise Document Usage - better exploit the information & data contained within your large physical records

Reduce Costs - save office space & eliminate document retrieval costs

Instant Searching - quick & easy access to documents removes need to manually search for information

Share Information - improve the display of your large assets with files that can be displayed online or easily shared with colleagues
