

Shift Manager

The Complete Fire Duty Roster Planning System

Intuitive and easy to use, Shift Manager generates shifts ahead of time, ensuring that appliances are always filled with the most suitable officer for each role.

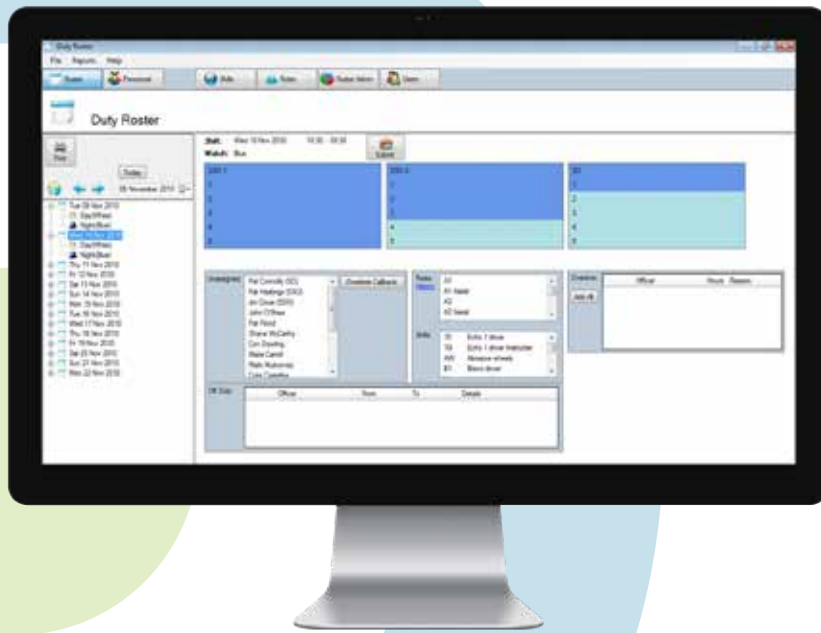

Individual training records are automatically tracked providing a comprehensive overview of officer skills to guarantee there will always be relevant cover available.

Generating and managing shift assignments has never been so easy and will make you wonder how you ever did without Shift Manager.

Benefits of Shift Manager

- ✓ Track availability of staff to ensure adequate cover is always maintained
- ✓ Manage roles to ensure the most suitable officer is assigned to each shift
- ✓ Reminders & alerts are issued when regular training requires updating
- ✓ Maximise the skill set of your team by identifying underused skill sets
- ✓ Generate shift assignments for future periods with a customisable shift pattern
- ✓ Intuitive drag and drop interface for modifying individual shifts
